

Doug McDorman | Principal Consultant

Profile

Doug McDorman is Principal Consultant in the Strong Authentication Services group at Certified Security Solutions, Inc. (CSS).

Doug specializes in authentication systems and solving complex problems in global heterogeneous enterprises with tools such as federation using SAML and WS-Federation, cross-platform authentication and authorization using Kerberos and LDAP, and X.509 certificate deployment with custom designed Public Key Infrastructure (PKI) systems. Doug is co-author of the "*Windows Security and Directory Services for UNIX Guide*" from Microsoft.

While at CSS Doug has helped enterprise customers in the Finance, Manufacturing, Telecommunications, Retail and Educational fields deploy solutions such as Single Sign-On systems (SSO), Federating with partners, and one of the largest Microsoft Certificate Services PKI deployments in existence.

Doug has over 16 years of experience in computer security, programming, databases, Internet technologies, and networking. His previous experience includes software development and management at CyberSafe, a Kerberos infrastructure product company, a Bachelors Degree in Computer Science from Queen's University, Canada, and a Masters of Business Administration from the University of Washington.

Personal Highlights

- ▶ Having previously been a ski instructor and ski patrol, Doug now looks forward to heli-skiing again when he isn't training for triathlons.
- ▶ Doug resides in the Seattle, WA area with his family and remains a proud Canadian citizen.

Publications

- ▶ Windows Security and Directory Services for UNIX Guide v1.0 (<http://go.microsoft.com/fwlink/?LinkId=36975>)
